---------	-------------	-----	------------	----------------------	---------	----------------------

- Wherever quantity has been specified as percentage (%), the quantity of mandatory spares to be provided by the Contractor shall be the specified percentage (%) of the total population of the Plant. In case the quantity of Mandatory Spares so calculated to be happens to be fraction, the same shall be rounded off to next higher whole number.
- Wherever the quantities have been indicated for each type, size, thickness, materials, radius, range etc. these shall cover all the items supplied and installed and the breakup for these shall be furnished in the bid.
- In case spares indicated in the list are not applicable to the particular design offered by the bidder, the bidder should offer spares applicable to offered design with quantities generally in line with approach followed in the above list.
- Price of each and every item is to be given separately. In case bidder mentions 'Not Applicable' against an item in the bid and later on the same spare is found to be applicable during detailed engineering, the vendor shall supply such spares free of cost.
- In case the description / quantity for any item mentioned in schedule is at variance from what has been stated in the Technical Specifications and its subsequent amendments and clarifications, the latter shall prevail.
- Wherever for the Mandatory Spares under "Unit Price" Column "LOT" has been mentioned, Bidder has to furnish "Total Price" only.
